

Features Completed -

- Starting Page - Login page, register page.. Etc
- Game Page
 - Multilplayers page, multiple people playing on the same page
 - Chat box
 - Leaderboard
 - Cannon shooting
 - Rotatable Tanks
 - Destroying and damaging the Tank

Issues Facing -

- Making the camera stay on the player, so the player doesn't move out of the map.
- Once you click on the chat box, the player still moves, so we have to make some type of focus function on the player and the chat box.
- Login system
- Performance Issue
- Making walls on the map
- After killing the first tank, the bullet gets slower

Suggestion by the TA -

- Look in JQuery focus element to fix our chatbox issues
- Centering can be difficult, use cookies to determine which tank is yours.
